

Nourhan Khalifa Abdelal

Data Analyst | Data Science

Cairo, Egypt | nourhankhalifa186@gmail.com | [LinkedIn: nourhankhalifa](#) | [GitHub: nourhankhalifa](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience from two data analytics internships (Digital Egypt Pioneers Initiative and EraaSoft), skilled in Excel, SQL, Power BI, and Python. Experienced in building data models, writing DAX, cleaning real-world datasets, and designing interactive dashboards that turn raw data into decision-ready insights.

TECHNICAL SKILLS

Programming Languages: SQL, Python, HTML, JavaScript, CSS

Data Analysis & BI: Power BI, DAX, Excel, Pandas, NumPy, Matplotlib, Plotly, Scikit-learn

Databases: SQL Server, MySQL, Database Design (ER Diagrams, Relational Modeling)

Tools: Git, GitHub, Jupyter Notebook, VS Code, Figma

Core Competencies: Data Cleaning, Data Modeling, Dashboard Design, Exploratory Data Analysis, Business Reporting

EXPERIENCE

Data Analyst Intern — Digital Egypt Pioneers Initiative (DEPI)

Data Analysis Track

Full project portfolio available on GitHub: github.com/nourhankhalifa/Data_Analysis

- Completed a project-based Data Analysis track covering SQL, Excel, Power BI, and Python.
- Built a 3-page Power BI hospital analytics dashboard on an 8-dimension star schema, covering visit volume, revenue, and clinical/financial KPIs.
- Designed a 4-page Power BI dashboard joining Amazon order and product-catalog data, including a dynamic Sales-vs-Units toggle measure using SELECTEDVALUE and IF.
- Built an Excel sales-performance dashboard analyzing profit, discounts, and production cost across 3,678 orders
- Cleaned and analyzed a real-world sales dataset in Python (pandas, Matplotlib, Seaborn, Plotly) using univariate, bivariate, and multivariate analysis.

Data Analyst Intern — EraaSoft

Data Analysis Track

Full project portfolio available on GitHub: github.com/nourhankhalifa/Data_Analysis

- Completed a project-based Data Analysis track covering database design, SQL, Excel, Power BI, and Python.
- Built a 7-table Retail Sales Management System in SQL Server and answered 50 real business questions using window functions and views.
- Built 3 Power BI dashboards of increasing complexity, culminating in a DirectQuery-connected sales dashboard with a role-playing date dimension (USERRELATIONSHIP) and drill-through reporting.
- Built 2 independent Excel dashboards, each on its own Power Pivot data model (Superstore sales analysis; multi-branch retail sales analysis).
- Cleaned and analyzed an HR dataset in Python/pandas, including binning, grouping, and feature engineering.

EDUCATION

B.Sc. in Data Science — Helwan National University

Faculty of Computer Science and Information Technology

Expected Graduation: 2027 | GPA: 3.10 / 4.0 | Senior (4th Year)

CERTIFICATIONS

- CS50: Introduction to Artificial Intelligence with Python — Harvard University (edX) [August 2026]
- CS50: Web Programming with Python and JavaScript — Harvard University (edX) [August 2026]
- CS50: Introduction to Computer Science with Python — Harvard University (edX) [July 2026]
- CS50: Introduction to Databases with SQL — Harvard University (edX) [July 2026]
- Data Analysis Track (Certificate 1 & 2) — Digital Egypt Pioneers Initiative (DEPI) [July 2026]
- Data Analysis Course — EraaSoft & Egyptian Engineers Syndicate, accredited certificate (June 2025)
